Dorothy: Please accept this email report as UW Whitewaters Student Chapter report.

Thank you Rex and I am glad of the coming revival!

Hi Chris. I was in Oshkosh at a Wisconsin Space Grant Consortium business meeting. The history of the club has been an interesting one. When I went to teach in Scotland for a semester, I took 9 of the students, including all of the officers with me. Juk agreed to maintain the club with new officers in my absence and then continue it for a whole year afterwards. When I returned, I discovered that after a few attempts, nothing "caught fire" with the club, and it went dormant. Then, we had the huge cohort graduate as Peter said, creating a bottleneck in our numbers. It is only now that the numbers and interest have increased (and I am back at the helm) that the students wish to revive the club. The paperwork for turning it back on as an official Org on campus is May 21, to start again in September, 2018. I have a tentative slate of officers, and the paperwork will be in on time.

I have attached the photo of the "old guard" signing the official document aligning us with AIPG and creating the chapter. Here's the status of all the folks (left to right).

Greg Guenther – now employed at Wisconsin Geological and Natural History Survey
Laura Dystra – grad school in hydrogeology at Ball State University
Me, I'm still here!
Tessa Snell - grad school in archaeology at UW-LaCrosse
Melanie Sorman – grad school in paleontology at Miami University of Ohio.

Hopefully, we can get as much good energy with the new group and carry on the tradition of these alums. If we have an event that I think would interest you, I'll let you know next fall.

Rex

That would be great Peter! If there is an event this year we can support, just let me know,

Chris,

I hope Rex can corner a student or two to send something in. The club dwindled significantly this year following a big graduating class. Hopefully they can report that at a minimum.

Peter

Dear Rex and Peter:

Do you think the Student Geology Club/Student AIPG Chapter be able to send in a report?
