Join FAPG, a section of AIPG, for their 2009 Annual Meeting and Technical Conference at the Casa Monica Hotel, St. Augustine, Florida. This conference has been designed to provide relevant information and training in today's emerging issues in water and water resources management. The conference will consist of panel discussions from representatives of the Florida Department of Environmental Protection, Florida Geological Survey, the water management districts, and the United States Geological Survey. These panel discussions are designed to provide a broad overview of the activities of these agencies with respect to water and water resource issues in Florida and the surrounding region.

Panel discussions will be followed on the second day by technical sessions. The technical sessions will expand upon the subjects covered in the panel discussions and will include papers which address fresh and brackish groundwater supply, deep injection wells, aquifer storage and recovery, contamination assessment and remediation, and state regulations. We welcome abstracts of up to 250 words for papers and all presentations will be oral with approximately 20 minutes of presentation and 10 minutes of questions.

Suggested technical session topics include, but are not limited to:

- Alternative Water Supply
- Water Conservation Programs
- Regional Approach to Water Sustainability
- Priorities of the Water Management Districts
- Deep Well Injections
- Fresh and Brackish Groundwater Supply
- Contamination Assessment and Remediation
- State Regulations
- Aquifer Storage and Recovery

Please submit your abstract by March 16, 2009 and include the name, address, phone numbers and e-mail address of all authors. Abstracts and papers should be in MS Word, Times New Roman, 12-point, single-spaced and left justified. All authors will be notified of acceptance by March 30, 2009.

Submit Abstracts to:
